

Most CyberTipline reports involve the upload of child sexual abuse material by users outside of the U.S. This is largely due to the fact that ESPs must comply with 18 USC 2258A, which requires U.S. companies to report to the CyberTipline if they become aware of suspected CSAM on their platforms and servers. Because these companies have users worldwide and those incidents are reported to NCMEC, by extension the CyberTipline serves as a global clearinghouse.

When a report is made, NCMEC geographic indicators related to the upload location of the CSAM are used to make the report available to the appropriate law enforcement. It is important to note that country-specific numbers may be impacted by the use of proxies and anonymizers. In addition, each country applies its own national laws when assessing the reported content. These numbers are not indicative of the level of child sexual abuse in a particular country.

The following is a breakdown of reports by country.

| Country / Territory | Reports |
|---------------------|---------|
| Afghanistan | 197,048 |
| Aland Islands | 25 |
| Albania | 8,821 |
| Algeria | 762,754 |
